No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage or retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 1

NUMBER 1, DECEMBER 1987

Editorial: On Reasons for a New Journal	<i>Kent K. Stewart</i>	1
Guest Editorial: The Journal of Food Composition and Analysis	<i>William J. Darby</i>	3
Guest Editorial: A New Opportunity for the Field of Food Composition: From Analysis to Application	<i>Vernon R. Young</i>	5
Guest Editorial	<i>Nevin S. Scrimshaw</i>	9
Inorganic Nutrient Composition of Retail Beef in the United States	<i>Wayne R. Wolf</i>	11
Nitrogen Composition of Vegetables Common to Japan <i>Nagako Tokoro, Mitsuyo Sawada, Yukiko Sukanuma, Misako Mochizuki, Kaoru Masuzawa, Yoritaka Aoyama, and Kiyoshi Ashida</i>		18
Lipids in Raw and Cooked Beef <i>Hal T. Slover, Elaine Lanza, Raymond H. Thompson, Jr., Carol S. Davis, and George V. Merola</i>		26
The Lipid Composition of Raw and Cooked Fresh Pork <i>Hal T. Slover, Raymond H. Thompson, Jr., Carol S. Davis, and George V. Merola</i>		38
Stability of Tocopherols and Tocotrienols in Food Preparation Procedures <i>Vieno Piironen, Pertti Varo, and Pekka Koivistoinen</i>		53
Gas-Liquid Chromatographic Determination of Fatty Acids and Sterols of Selected Iraqi Foods <i>Izaldin M. H. Al-Khatib, S. A. Hanifa Moursi, A. W. R. Mehdi, and M. M. Al-Shabibi</i>		59
Physicochemical Characters and Nutrient Composition of Some Improved Lines of Lentils Grown in Pakistan <i>M. Akmal Khan, Iftikhar A. Rana, Ihsan Ullah, and Saeeda Jaffery</i>		65
Selenium Contents of Rice Grown at Various Sites in Japan <i>Munehiro Yoshida and Kyoden Yasumoto</i>		71
Thiamine, Riboflavin, and Ascorbic Acid Levels in Infant Formulas Manufactured in the United States <i>J. I. Martin, E. C. Phifer, D. M. Hines, T. W. Hamill, E. R. Young, R. R. Eitenmiller, and A. M. Soliman</i>		76
Dietary Fiber and Starch in Some Southeast Asian Fruits <i>John K. Candlish, Lynn Gourley, and H. P. Lee</i>		81
Prepared Salads: Aspects of Their Lipid Composition <i>J. H. Makinson, H. Greenfield, and R. B. H. Wills</i>		85
Fat Uptake during Deep-Fat Frying of Coated and Uncoated Foods <i>J. H. Makinson, H. Greenfield, M. L. Wong, and R. B. H. Wills</i>		93

NUMBER 2, MARCH 1988

Editorial: Are They Different? I. Zero Levels	<i>Kent K. Stewart</i>	103
Review: Methods for Determination of Vitamin B ₆ in Foods and Other Biological Materials: A Critical Review	<i>Jesse F. Gregory III</i>	105
Stability of Tocopherols and Tocotrienols during Storage of Foods	<i>Vieno Piironen, Pertti Varo, and Pekka Koivistoinen</i>	124
Purine Content of Selected Canadian Food Products	<i>Danielle Brulé, Ghulam Sarwar, and Laurent Savoie</i>	130
Phytic Acid and Zinc Contents of Cereal Products: Relation to the Manufacturing Process. 1. Phytic Acid	<i>P. Le Francois</i>	139
Phytic Acid and Zinc Contents of Cereal Products: Relation to the Manufacturing Process. 2. Zinc	<i>P. Le Francois</i>	146
Analysis of Individual Foods for the Validation of Sugars and Starch Contents of Compositeds Diets	<i>Betty W. Li, Mary W. Marshall, Karen W. Andrews, and Tangita T. Adams</i>	152
Evaluation of Ten Digestion Methods for Use Prior to Mercury Determination	<i>J. L. Burguera and M. Burguera</i>	159
Nutrient Composition of U.S. and New Zealand Lamb	<i>K. C. Lin, H. R. Cross, H. K. Johnson, B. C. Breidenstein, and K. Ono</i>	166
Carotenoids and Retinoids in Finnish Foods: Meat and Meat Products	<i>Velimatti Ollilainen, Marina Heinonen, Eeva Linkola, Pertti Varo, and Pekka Koivistoinen</i>	178
The Effect of Packaging on Vitamin Stability in Cereal Grain Products—A Review	<i>D. B. Ott</i>	189
Note: Preliminary Studies on the Phytate Content of Nigerian Foods	<i>B. F. Harland, O. L. Oke, and R. Felix-Phipps</i>	202
Announcements		206

NUMBER 3, JUNE 1988

Editorial: Food Composition and Biotechnology	<i>Kent K. Stewart</i>	207
Lithium, Boron, and Nitrogen in 1-Day Diet Composites and a Mixed-Diet Standard	<i>W. Brian Clarke and Rosalind S. Gibson</i>	209
Carotenoids and Retinoids in Finnish Foods: Ready-to-Eat Foods	<i>Marina Heinonen, Velimatti Ollilainen, Eeva Linkola, Pertti Varo, and Pekka Koivistoinen</i>	221
Vitamin E Content of Crude and Refined Vegetable Oils in Southern Brazil	<i>Indrajit D. Desai, Hemmige Bhagavan, Richard Salkeld, and José E. Dutra de Oliveira</i>	231

Analysis of Trace Volatiles in Food and Beverage Products Involving Removal at a Mild Temperature under Vacuum	<i>J. R. Vercellotti, A. J. St. Angelo, M. G. Legendre, G. Sumrell, H. P. Dupuy, and G. J. Flick, Jr.</i>	239
Heavy Metals in Foods from the Paraíba do Sul River Valley, Brazil	<i>José Maurício P. Azcue, Wolfgang C. Pfeiffer, Carmen Marino Donangelo, Marlene Fiszman, and Olaf Malm</i>	250
Vitamin B ₆ and Protein Content of Infant Formulas Manufactured in the United States	<i>E. R. Young, R. R. Eitenmiller, and A. M. Soliman</i>	259
High-Performance Liquid Chromatographic Determination of Vitamin C in Fresh Fruits from West Africa	<i>P. A. Diop, D. Franck, P. Grimm, and C. Hasselmann</i>	265
Yields and Nutrient Composition of the Solid and Liquid Portions of Selected Canned Fruits	<i>J. Augustin, P. D. Tassinari, P. K. Melethil, S. R. Hagen, M. L. Perkins, and R. H. Matthews</i>	270
Thiamin Content in Air-Classified <i>Phaseolus vulgaris</i> (Pinto Bean) Flour Fractions	<i>D. B. Ott, M. E. Zabik, M. A. Uebersax, and J. A. Machiorkatti</i>	279
Trace Mineral Contents and Fe/Zn Ratio in Goat Meat	<i>Young W. Park</i>	283
Book Review: <i>Food Composition Data: A User's Perspective</i> , edited by W. M. Rand, C. T. Windham, B. W. Wyse, and V. R. Young	<i>Jean A. T. Pennington</i>	290

NUMBER 4, NOVEMBER 1988

Editorial: Improvement of Food Composition Data: Needs for Analytical Training	<i>Kent K. Stewart</i>	291
Acknowledgement to Reviewers		293
Selenium in Foods in France	<i>Monique Simonoff, Charles Hamon, Philippe Moretto, Yvan Llabador, and Gabriel Simonoff</i>	295
Chromium Content of Selected Breakfast Cereals	<i>Richard A. Anderson, Noella A. Bryden, and Marilyn M. Polansky</i>	303
Zinc, Iron, and Copper Contents of Eggs from Hens Fed Varying Levels of Zinc	<i>James L. Stahl, M. E. Cook, and J. L. Greger</i>	309
Phytate, Zinc, and Calcium Contents of 30 East African Foods and Their Calculated Phytate:Zn, Ca:Phytate, and [Ca]/[Phytate]/[Zn] Molar Ratios	<i>Elaine L. Ferguson, Rosalind S. Gibson, Lilian U. Thompson, Stephanie Ounpuu, and Margaret Berry</i>	316
The Effect of Topping Frequency on Nutrient Content of Sweet Potato Green Tips	<i>R. D. Pace, G. G. Dull, B. R. Phills, C. Bonsi, and I. T. Forrester</i>	326
Carotenoids and Retinoids in Finnish Foods: Dietary Fats	<i>Marina Heinonen, Velimatti Ollilainen, Eeva Linkola, Pertti Varo, and Pekka Koivistoinen</i>	334

Carotenoids and Pro-Vitamin A Value of White Fleshed Brazilian Sweet Potatoes (<i>Ipomoea batatas</i> Lam.)	
<i>Ligia B. Almeida and Marilene V. C. Penteado</i>	341
Chemical Composition of a New Variety of the Andean Lupin (<i>Lupinus mutabilis</i> cv. Inti) with Low-Alkaloid Content	
<i>R. Gross, E. von Baer, F. Koch, R. Marquard, L. Trugo, and M. Wink</i>	353
Note: Phenolic Content of <i>Vanilla planifolia</i> as Affected by Harvest Period	
<i>L. Sagrero-Nieves and S. J. Schwartz</i>	362
Note: Lipid Composition of Chironji (<i>Buchanania lanzan</i>) Kernel	
<i>J. Hemavathy and J. V. Prabhakar</i>	366
Note: The Nutrient Composition of an Insect Flour Sample from Lake Victoria, Uganda	
<i>Donald Bergeron, Rodney J. Bushway, Franklin L. Roberts, Irv Kornfield, John Okedi, and Alfred A. Bushway</i>	371
Announcements	378
Erratum: Volume 1, Number 3, June, 1988: E. R. Young, R. R. Eitenmiller, and A. M. Soliman, "Vitamin B ₆ and Protein Content of Infant Formulas Manufactured in the United States," pp. 259-264	379

Journal of Food Composition and Analysis

INFORMATION FOR AUTHORS

The *Journal of Food Composition and Analysis* will publish manuscripts on all scientific aspects of the data on chemical composition of human foods with particular emphasis on analytical methods, data on composition of foods, studies on the manipulation, storage, distribution, and use of food composition data, and studies on the statistics, use, and distribution of such data and data systems.

A primary goal of this Journal is to provide sufficient description of the food samples, analytical methods, quality control procedures, and statistical treatments of the data to permit the end users of the food composition data to evaluate the appropriateness of such data in their projects.

Manuscripts. Manuscripts should be submitted in triplicate to: Dr. Kent K. Stewart, Editor, *Journal of Food Composition and Analysis*, Department of Biochemistry and Nutrition, Virginia Polytechnic Institute and State University, Blacksburg, Virginia 24061, U.S.A.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Food Composition and Analysis* represent the opinions of the authors and should not be construed to reflect the opinions of the Editors, INFOODS, United Nations University, or the publishers. Any data included in articles on commercial foods are reported solely as factual information and are limited to the samples analyzed. No warranty or guarantee is made or implied that other samples of these products will have the same or similar composition. The inclusion of such articles or data does not imply endorsement of any product by INFOODS, United Nations University, the Editors, or the Publisher.

Authors submitting a manuscript do so on the understanding that, if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. For employees of national governments, this provision applies only to the extent to which copyright is transferable under the laws and regulations of the country of the employee. All manuscripts must have a completed copyright form prior to publication. The Publisher will not refuse any reasonable request by the author to reproduce any of his or her contributions to the journal.

Articles should be concise and in English. Submit three complete copies including the original in typewritten form, double-spaced, with one-inch margins on all sides. The title should be limited to 15 words or 80 characters. The abbreviated running title should contain no more than 50 characters. The name and mailing address (telephone and Telex numbers also, if possible) of the corresponding author, to whom proofs and other correspondence are to be sent, should be clearly indicated.

Use generic names of chemicals whenever possible. Proprietary names and trademarks should appear only to identify the source of the chemical and subsequently only the generic name should be used. All abbreviations should be unpunctuated.

An abstract, consisting of 150–200 words, should be typed on a separate page, preceding the text.

Tables. Tables are to be numbered consecutively with Arabic numerals. The table numbers and titles should be listed on a separate sheet. *Tables will be reproduced as camera-ready copy.* Therefore, they should be carefully and clearly typed since, except for reduction in size, they will appear exactly as submitted. If the tables will be prepared using a word processor or computer, it is recommended that a daisy wheel printer be used. If a daisy wheel printer is unavailable and a dot matrix printer will be used, it is important that the density of the dots (i.e., the

number of dots in the matrix) be sufficient that the numbers do not appear broken. Short tables of one or two pages in length should be typed double-spaced and planned to fit an area of 5 × 8 in. (13–20 cm) after reduction to 40% of the original size. Lengthy tables should be typed single-spaced and divided into sections so that each section can fit in the area indicated. *Repeat column headings when dividing tables.* Insert a zero in front of a decimal point when it applies. For instance, instead of .36, use 0.36. No corrections will be made to the tables themselves in proofs; corrections will be added as typeset footnotes.

Footnotes. In text footnotes should be indicated by superscript numbers and should be typed on a separate sheet accompanying the manuscript. Table footnotes should be identified by superscript lowercase letters and placed directly beneath the tables.

Figures. Figures should be completely understandable even without reading the text and should be numbered consecutively with Arabic numerals. Every figure should have a legend. All legends should be typed double-spaced in a list on a separate sheet. Graphs and charts should be professionally prepared and may be submitted as original ink drawings or as sharp black-and-white photographic reproductions. The size of the lettering of the figures and charts must be legible when reduced to one-half size. Photocopies of figures are not acceptable. Each figure should be identified in a margin with the name of the journal, author's name, and figure number.

Photographs. Black-and-white photographs and photomicrographs may be submitted as glossy prints. If a full-page plate is desired, please submit the photograph in size 5 × 7 in. or any ratio thereof. Illustrations in color can be accepted only if the authors defray the cost. Do not clip or mark the photographs in any way; figure identification should be indicated in pencil on the reverse.

Standards and References. All abbreviations, chemical names, and journal names should follow the style of *Chemical Abstracts Service Source Index*, 1985. A useful writing guide is the *CBE Style Manual*, 5th ed., 1983, published by the Council of Biology Editors. Reference citations in the text consist of the author's name and the year of publication in parentheses: (Jones, 1986), (Jones and Smith, 1987), or (Jones *et al.*, 1986). References should be given in the language of the original paper. List references alphabetically by name. Note the following styles to be used:

PAUL, A. A., AND SOUTHGATE, D. A. T. (1978). McCance and Widdowson's *The Composition of Foods*. Her Majesty's Stationery Office, London and Elsevier/North-Holland Biomedical Press, Amsterdam/New York/Oxford.

SLOVER, H. T., AND THOMPSON, R. H., JR. (1985). The development and use of quality control samples in food lipid analysis. In *Biological Reference Materials: Uses and Need for Validation of Nutrient Measurement* (W. R. Wolf, Ed.), pp. 239–253. Wiley, New York.

VANDERSLICE, J. T., MAIRE, C. E., DOHERTY, R. F., AND BEECHER, G. R. (1980). Sulfosalicylic acid as an extraction agent for vitamin B₆ in food. *J. Agric. Food Chem.* **28**, 1145–1149.

Proofs. Proofs will be sent to the corresponding author with reprint order forms. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints of each article will be supplied free to the corresponding author. Additional reprints may be ordered using the form accompanying the proofs.

For information about advertising in *Journal of Food Composition and Analysis*, please contact Calvin Caldwell, Advertising Coordinator, Journal Promotion Department, Academic Press, Inc., 1250 Sixth Avenue, San Diego, California 92101 (telephone: (619) 230-1840).

Do you have the true spirit of enterprise?

The Rolex Awards for Enterprise were inaugurated in 1976 with a single aim: "To encourage the spirit of enterprise in individuals throughout the world by acknowledging outstanding personal contributions made in selected categories of human endeavor." The activities that the Awards set out to honor are the ones that have long been valued by Rolex and by Rolex owners.

Rolex now takes pride in announcing that 50,000 Swiss francs and an engraved 18kt gold Rolex Chronometer will be awarded to the five self-motivated winners who have developed projects displaying the most outstanding spirit of enterprise.

AREAS OF ENTERPRISE.

Candidates may submit projects in five categories—Applied Sciences and Technology; Exploration and Discovery; The Environment. The Selection Committee will be evaluating these projects in terms of their spirit of enterprise, originality and the likelihood of realization.

If your venture falls outside the Committee's area of expertise, Rolex will refer specialists to appraise the merits of your particular proposal.

An illustrated Spirit of Enterprise, summarizing the best projects

submitted for the 1990 Awards, will be published concurrent with the Awards ceremony. The publicity given to projects in previous editions of the book has often led to additional support from a wide range of sources.

HOW TO APPLY.

Your entry must be submitted in English on an official application form and must reach the Secretariat before March 31, 1989. To obtain that form, and the rules and conditions for entry, write: The Secretariat, The Rolex Awards for Enterprise, P.O. Box 178, 1211 Geneva 26, Switzerland.

The Awards will be presented in Geneva at the end of April 1990.

If you possess originality, imagination and initiative, you will not let this opportunity pass you by.

ROLEX

THE 1990 SELECTION COMMITTEE

CHAIRMAN:

Mr. André J. Heiniger (Switzerland). Chief Executive Officer and Managing Director of Montres Rolex S.A., Geneva.

MEMBERS:

Dr. George V.B. Cochran (USA). Professor of Clinical Orthopaedics, Columbia University, New York. Past President of the Explorers Club.

Miss Fleur Cowles (Great Britain). Painter and authoress. Member of the World Wildlife Fund International Council.

Dr. Xavier Fructus (France). Specialist in hyperbaric physiology; Scientific Director of COMEX, Marseilles.

Professor Yoshimine Ikeda (Brazil). Oceanographer specializing in Antarctic research. Professor at the Oceanographic Institute of the University of São Paulo.

Kisho Kurokawa (Japan). Architect. President of Kisho Kurokawa Architect and Associates, and Director of the Institute of Social Engineering, Inc., Tokyo.

Dr. Hans Joachim Panitz (FRG). Telecommunications engineer. Payload Operations Manager at the German Aerospace Establishment—DFVLR, Cologne.

Professor Carlo Rubbia (Italy). Physicist and 1984 Nobel Laureate. Project Spokesman at the CERN (European Laboratory for Particle Physics).

Mr. Robert Stenuit (Belgium). Underwater archaeologist and author.

New and Recent Titles from Cambridge University Press

Toxicological Evaluation of Certain Food Additives and Contaminants

*The Joint FAO/WHO Expert Committee
on Food Additives*
WHO Food Additive Series

Volume 20

Examines such substances as enzyme preparation and enzyme immobilizing agents, flour treatment agents, food colors, sweetening agents and thickening agents.

1987/304 pp./34347-X/Paper \$24.95

Volume 21

Explores antioxidants, food colors, sweetening agents and thickening agents. Details such food additives as glucono delta-lactone, sulfur dioxide and sulfites, while looking at the role of lead as a contaminant.

1987/282 pp./35985-6/Paper \$27.95

Volume 22

Focuses on four groups of substances which include enzyme preparations, smoke flavorings, food colors, and glutamic acid and its salts.

1988/192 pp./36928-2/Paper \$29.95

Animal and Human Calorimetry

J.A. McLean and G. Tobin

Provides a comprehensive survey of the theory, practice and techniques of calorimetry as applied to the study of energy metabolism in humans and animals.

1988/352 pp./30905-0/Cloth \$69.50

Leaf Protein and Its By-Products in Human and Animal Nutrition

N.W. Pirie

Focuses on recent advances in the appreciation of value of the fiber residue from fractionating leafy plants and in the attempts to use the soluble leaf components as a substrate for cultivating microorganisms.

1987/200 pp./33030-0/Cloth \$37.50

Nutrition, Diet and Health

Michael J. Gibney

Explores the relationship between diet and health and offers sound, practical advice on the effects of dieting and exercise as well as information about the role of fats, fiber, vitamins, and other constituents of our daily diet.

1986/200 pp./30134-3/Cloth \$29.95

/31756-8/Paper \$8.95
